

**News Letter No: 90**

**July- 2009**

***Sub : Installation of automatic sand transportation system.***

**Magna is happy to announce the installation of its fully automated sand transportation system.**

**The sand transportation system was supplied by M/S. KLEIN Anlagenbau AG, Germany, consists of**

- 1. Sand Storage hoppers of 80 MT capacity**
- 2. Sand transportation pump with 5 Tons / hour capacity**
- 3. Distribution hoppers at the user departments.**

**Sand Pumping System**

**This system was formally inaugurated by Mr. Martin Rohr, Casting commodity – Manager along with Mr. Mr**

Thomas Hediger, Senior Buyer, M/S. ABB Turbo Systems Ltd, Baden, Switzerland on the 21st April 2009.

**This system was formally inaugurated by Mr. Martin Rohr, Casting commodity - Manager, M/s ABB Turbo Systems Ltd.**

The newly installed system will deliver the following benefits,

1. Storage of graded sand
2. Supply of right quality of graded sands to various operations like core making, green sand molding and no-bake molding
3. Elimination of manual operation

**Sand Storage Hoppers**

With this plant, our customers will be benefitted with improved surface finish of the castings supplied and reduction in rejection rate like reduction in sand inclusions.
