***Sub : Modernization of raw material storage yard.***

Magna is happy to announce the modernization of its raw material storage yard for melting.

The modernization project includes relocation of existing storage yard to new location, which improves material flow layout, provision of material handling equipments like overhead cranes, electromagnetic lifter etc.

**This facility was formally inaugurated by Mr. Rene Suazo, Project Manager - CFS, Global Sourcing, Woodward, Fort Collins, USA on 15th June 2009.**

**This new facility will help Magna in**

**a. Reducing material handling**

**b. Increased accuracy of weight of the raw materials charged into the furnace**

**c. Improved working conditions for operators.**
