Sub : Installation of Universal Core Shooter.

Magna is pleased to announce installation of its first universal core shooter. This new core shooter can make cores in horizontal and vertical positions using cold box process.

This new core shooter has a maximum core box size of 600mm X 600mm X 300 mm with sand magazine capacity of 30 liters can deliver 50 shoots per hours.

The new core shooter was formally inaugurated by Mr. Dirk Naundort, Manager Strategic Purchase along with Mr. Erik Steiniger, Procurement Supplier Development and Mr. Jay K.Mani, Strategic Purchase of M/S. LESER GmbH & Co. KG, Hamburg, Germany on the 28th May 2010.

With this new core shooter Magna will be able to

- 1. Convert the existing cores made in conventional CO2 process into more stable cold box process.**
- 2. Enhance product range by developing more critical core shaped castings.**
- 3. Increasing core production capacity to serve customers better.**
