September - 2004

Sub: Installation of Furan Fast Loop Molding Line.

Magna is glad to announce the installation of Furan Fast Loop Molding Line. This line consists of a Continuous mixer of 10Tons per hour capacity supplied by M/S. IMF, Italy, mold stripper, ovens for mold curing, painting stations and a pouring line. Molds made in chemical bonded process with Furan as binder.

This facility was formally inaugurated by Mr. L.G.Varadaraj, Chairman, Magna Electro Castings Ltd on 23rd August 2004.

**Mr. L.G.
Varadaraj,
Chairman,
Magna Electro
Castings Ltd,
inaugurating
the newly
installed Furan
Fast Loop**

Molding Line.

This Line will have a maximum mold size of 1200 X 1000 X 700 mm with a capacity of 10 molds per hour.

With the Furan Fast Loop Line, Magna will be able to make heavy castings with good surface finish and excellent dimensional stability along with added additional capacity.

Continuous Mixer

Mold Stripper

With this Line Magna will be able to compete globally by Technology, quality and productivity.
