

News Letter No: 33

October - 2004

Sub: Installation of Sand Reclamation plant.

Magna is glad to announce the commissioning of the sand reclamation plant for its Furan Fast Loop Molding Line.

The Reclamation plant has reclaiming capacity of 10 Tons per hour and a storage capacity of 60 Tons of sand from Furan Resin based molds.

The facility was inaugurated by Mr.Sanjay Jayavarthanavelu, Executive Director, Lakshmi Machine Works Ltd, Coimbatore, India on 6th September 2004.

Mr. Sanjay Jayavarthanavelu, Executive Director, Lakshmi Machine Works Ltd, inaugurating the newly commissioned sand reclamation plant.

The reclamation plant consist of a vibrating knock-out station, cooler classifier, dust extraction systems and storage silo all are supplied by M/S. IMF, Italy.

**Newly commmissioned
Sand Reclamation plant.**

With this facility, Magna will be able to recycle its molding sand for Furan Fast Loop line with re-usability of more than 90%. This will enable Magna to maintain a clean environment and preserve natural resources apart from manufacturing cost effective products.
