December - 2004

Sub: Installation of New Intensive Mixer.

Magna is glad to announce the installation of its new state-of-the art intensive mixer for its green sand mixing plant.

The newly installed green sand mixer has a mixing capability of 1 Tons/mix with a cycle time of 130 – 150 seconds per mix. The mixer was supplied by M/S. Rhino Machines with the design from M/S. Foundarc.

The new intensive mixer, which is replacing the existing mixer, has the following advantages,

- **Lower Binder addition rate for the improved sand properties.**
- **Lower power consumption.**
- **Automatic compactability control**
- **Improved surface finish of the castings produced.**
- **Lesser sand related rejections.**

The Mixer is also having provisions for automatic dosing systems for addition of additives like sand, Bentonite, Coal dust etc.

With this new mixer Magna will be able to provide cost effective products to our customers.

WISH YOU A HAPPY NEW YEAR 2005
