***Sub: Installation of Rotary Type Component Washing Machine.***

Magna is happy to announce the installation of Rotary type component washing machine for cleaning of products.

This Rotary type washing machine has a cleaning chamber size of 1200 X 1200 X 800 mm with heating arrangements to heat the water upto 75°C and to maintain the set temperature.

This facility was formally inaugurated by Mr. Vinod Salunke, Manager Projects, General Electric Transportation Systems (Rail Division), India on 9<sup>th</sup> November 2005.

All the machined components dispatched at Magna will be cleaned with this machine at a pressure of 4 kg/cm<sup>2</sup> with water jet containing adequate rust prevention compounds to remove all the loose burrs inside and complete degreasing.

**With this facility Magna will be able to clean the dirt, dust, burrs, oil and swarf inside the parts even with complex geometry. Magna will be able to eliminate the inconveniences caused to customers due to swarf / burrs / dirt inside the components.**
