

## **Sub:Expansion of Cleaning Room Facilities.**

Magna is happy to announce the installation of additional new shot blasting machine in its Finishing Division.

This new shot blasting machine was supplied by M/S. DISA, world leader in foundry equipments. It has a capacity to handle 500 kilograms / cycle at 4 minutes/cycle. It can handle 3000 Tons / Month.

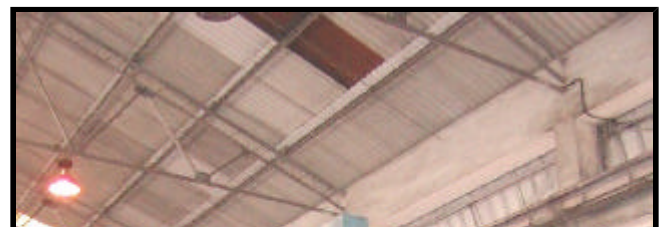

This shot blasting machine was formally inaugurated by Mr. Pravin Patel, Supplier Quality Engineer, M/S. Woodward, Rockford, USA.

**Mr. Pravin Patel, Supplier Quality Engineer, M/S. Woodward, Rockford, USA inaugurating the newly installed shot blasting machine.**

This new shot blasting machine has the following advantages:

- Will meet the additional shot blasting requirements for the proposed foundry expansion from 600 tons/month to 1200 tons/month.
- Reduces shot blasting time to 4 minutes / cycles from 15 minutes per cycle.
- Improved surface finish of castings.
- Improved safety to the operators as the operation is completely automated.
- Reduced energy and shots consumption.
- Lower noise and air pollution to the environment.
