## **Sub : Installation of high speed band saw cutting machine.**

Magna is happy to announce the addition of high speed band saw cutting machine to its product development department.

This cutting machine has a table size of 900 X 900 mm with a saw blade size of 5800 X 41 X 1.3 mm and a stroke length of 580 mm.

This machine was formally inaugurated by Mr. Sanjay Srivastava, Projects manager, GE Transportation Systems, Bangalore, India on 23rd January 2007.

**Mr. Sanjay Srivastava, Projects Manager, GE Transportation Systems inaugurating the new machine.**

This machine will be used to evaluate the internal soundness of high integrity castings during development stage. Also

internal soundness of castings in periodic intervals to assess the process stability and need for improvement actions.

**Newly installed high speed cutting machine**

With this new machine Magna can speed up the product development process and ensure sound castings consistently supplied to its customers.
