Sub : Installation of new mold handling line for green sand molding line.

Magna is happy to announce the installation of new mold handling system for its Green Sand High Pressure Molding Line.

The new mold handling line consists of accumulating conveyor for storing of molds, mold transfer station, pouring station, cooling station and knock-out station. The new mold handling line was supplied and installed by M/S. Hunter Automated Machinery Corporation, USA, the world leaders in matchplate molding.

Newly installed Mold Handling Line

The new mold handling line was formally inaugurated by Mr. Antii Ripola, Purchasing Manager along with Mr. Juha Sointula, Purchasing Engineer from M/S. Sandvik Mining And Construction OY, Lahti, Finland on 13th June 2007.

Mr. Antti Ripola, Purchasing Manager of M/S. Sandvik Mining and Construction OY, Lahti, Finland is inaugurating the new mold handling line.

The advantages of this mold handling line:

1. Improved operator safety and work environment.
2. Improved product quality by reducing defects like mold leak and mold shift.
3. Reduced cycle time to accommodate future improvements in molding machine.

This new mold handling line will enable Magna to supply products with enhanced quality to its customers and safe work environment to its employees.
