**Sub : Installation of new melting furnace.**

Magna is happy to announce the installation of new melting furnace to enhance production capacity.

This new Induction furnace is of 0.750 MT crucible capacity runs with 750KVA electric power.

This new furnace was formally inaugurated by Mr. S.K.Shankarraman, Technical Advisor and the first employee of Magna Electro Castings Ltd on 23rd March 2007.

This new Induction furnace with 24 MT of liquid metal per day will help to enhance production capacity from 600 MT to 900 MT as a part of Phase I expansion program.

This new furnace will enable Magna to cater the additional quantity requirements and to meet the new customer demand.
